Overview

The TVR 15HD is a full hybrid recorder that can work with standard analog, HD-TVI, and IP cameras. The TVR 15HD also features the signature built-in TruVision intrusion integration functionality.

Firmware 1.1 contains enhancements and a defect fix.

Enhancements

- New device activation method via complex password
- New password recovery method via XML procedure

This firmware introduces a new method for the recovery of a lost admin password. Compatibility with new Device Manager 4.0

- Support for 5 MPX HD-TVI cameras

This firmware allows the TVR 15HD to work with the new 5 MPX HD-TVI cameras.

The maximum number of 5 MPX HD-TVI cameras is limited to a quarter of the number of recorder channels.

- ▶ 4-channel recorder: Maximum of one 5 MPX camera can be added to channel 1
- ▶ 8-channel recorder: Maximum of two 5 MPX cameras can be added to channel 1 and 2
- ▶ 16-channel recorder: Maximum of four 5 MPX cameras can be added to channel, 2, 3 and 4
- Intrusion integration: An enhancement has been made to the heartbeat listening mechanism, so that the risk of a missed event has been mitigated.

Bug fix

- The firmware fixes an issue with the display of text on the webpage when the password has been locked out after five faulty attempts.

Contacting support

For help installing, operating, maintaining, and troubleshooting this product, refer to this document and any other documentation provided. If you still have questions, contact us during business hours (Monday through Friday, excluding holidays).

Note: Please be ready at the equipment before calling.
