OVERVIEW

The IFS Fiber to Ethernet Media Converters with PoE Injectors provide a cost-effective solution for deploying remote PoE powered edge devices with optical fiber.

Ethernet data can be transmitted up to 15km to a remote location depending on model and optic fiber used. At the remote location, the module can be installed near a power source and injects 48VDC PoE power to transmit simultaneously with the Ethernet data over Category network cable for the last 100 meters to the remote PoE edge device.

In addition, these modules utilize a high performance Store-and-Forward architecture with IEEE 802.3x Flow Control (Full-Duplex) preventing packet loss. With the LFP (Link Fault Pass-through) function (LLCF/LLR) enabled, the module also provides an efficient method of alerting network administrators of any link problems.

These modules are an inexpensive and efficient way to eliminate extra AC wiring and reduce the need for dedicated electrical outlets in walls, ceilings or any unreachable place, providing optimized power management for IP-based surveillance cameras, wireless access points (WAP) or any remote network edge device application.

STANDARD FEATURES

Ethernet
- 10/100Base-TX
- Complies with IEEE 802.3, IEEE 802.3u
- Auto-negotiation and MDI/MDI-X
- Store-and-Forward architecture
- Supports maximum frame size to 1600 bytes
- IEEE 802.3x full-duplex flow control, back pressure in half-duplex to eliminate packet loss

Power over Ethernet (PoE)
- Complies with IEEE 802.3af
- Inserts 48 VDC (15.4w) power on Category network cable
- Protects non-PoE devices if accidentally connected

Fiber
- 100Base-FX
- Multi-mode or single mode versions
- Distances up to 15km

Installation & Diagnostics
- Plug-and-play installation
- Compact size
- Auto Loop Back Test function
- LED indicators offer simple network diagnosis
- Link Fault Pass through function for remote alarm notification

Warranty
- 3-year warranty
Fiber to Ethernet
Media Converters
with PoE Injector

Specifications

Ethernet
- Data Rate: 10/100Base-TX with Auto-negotiate (IEEE 802.3 / 802.3u)
- Throughput (packet per second): 148810pps @ 64Bytes
- Switch Architecture: Store-and-Forward
- Flow Control: Back pressure for Half-Duplex mode
  Pause from for Full-Duplex mode (IEEE 802.3x)
- Connector: RJ-45 with Auto-MDI/MDI-X and PoE injector function
- Cable Type and Distance: 10Base-T (Cat 3, 4, 5e) or 100Base-TX (Cat 5e) – 328ft (100m)

Fiber

<table>

Optics

- Wavelength: 1300 nm
- Launch Power (dBm): Max. -14; Min. -19.0
- Receive Sensitivity: -34.5dBm
- Maximum Input Power: -14dB

Power over Ethernet (PoE Injector)

- PoE Standard: IEEE 802.3af
- Power PIN Assignment: (+) Pins 1 & 2; (-) Pins 3 & 6
- Power Output (Max. 1 PoE Device): PoE 48 VDC, Max. 15.4 watts, 350mA

Electrical & Mechanical

- Power: 48V DC @ 0.38A
- Enclosure: Metal
- Dimensions (H x W x D): 1.02 x 2.76 x 3.82 in. (26 x 70 x 97 mm)
- Weight: 0.44 lbs/200g

Environmental

- Operating Temperature: 0° ~ 50°C
- Storage Temperature: -20° ~ 70°C
- Relative Humidity: 0% ~ 90% (non-condensing)

Standards Compliance

Regulation: FCC Part 15 Class A, CE

Typical Application

- Power Supply
- IP PoE Camera
- Ethernet with PoE
- Cat 5e Cable
- Fiber to Ethernet with PoE Injector
- Ethernet to Fiber Media Converter
- Network Switch
- 100m (328 ft) Max.
- Network Fiber Switch
