

NetworX Wireless LCD Display Keypad

OVERVIEW

The NetworX wireless LCD display keypad is an integrated 48-zone wireless receiver LCD keypad with traditional design and an easy-to-read, customizable display. It is compatible with all NetworX control panels.

The NetworX wireless LCD display keypad offers the convenience of having an integrated wireless receiver built into the keypad along with standard hardwire features. A removable door allows the user to swing the door down or simply take it off for use. The emergency keys are highlighted on the keypad and can be programmed to contact and send complete information to a responding police, fire or EMS unit with just one touch. There are also five pre-programmed touch keys that allow the most common functions to be performed with ease. All keys are backlit to ensure error-free operation — even in a dark room.

The NetworX wireless LCD display keypad is cost-effective and easy to install. Designed for functionality and compatibility, it's the right keypad to fit any application.
