Leading transmission solutions for today’s demanding IP security networks

IFS® delivers cost-effective, high-performance network transmission solutions for IP video, access and life safety applications.
Robust performance. Complete flexibility.

Offering a wide range of analog and digital products with seamless migration to leading IP technology, IFS® transmission solutions represent high performance and flexibility to meet your current and future needs.

With a comprehensive catalog of network switches, media converters, PoE accessories and power supplies, IFS solutions provide an integrated communication platform that combines powerful hardware with Command Line Interface (CLI) or simple, yet powerful, browser-based software for efficient operation and management.

Industry-leading development and support

Combining solid engineering practices and quality components, IFS products have a long-standing reputation for precise design that is field-proven and time-tested. All IFS network products meet IEEE standards to provide full interoperability with other vendors in an enterprise network environment.

Interlogix provides pre- and post-sales engineering support, and all IFS network products undergo stringent quality control processes backed by a three-year warranty.
IFS® network switches by Interlogix are designed to meet the needs of security integrators. Engineered with a high-bandwidth, non-blocking switch fabric, IFS switches provide low-latency IP video performance and advanced layer 2 and/or layer 3 features offering network interoperability and network management for small-to-medium commercial environments, as well as at the enterprise level.

Key features, such as powerful PoE management, advanced security and built-in diagnostic tools, are all easily accessible through CLI or a browser-based interface. IFS network switches effectively accommodate IP-based video, access and intercom, as well as VoIP and WAP applications.

**ES Series**

**Web Smart Switches**

Designed for stand-alone Ethernet systems, the IFS Economy Series (ES) Web Smart switches provide basic Layer 2 management capabilities with RJ45/SFP GigE trunking ports. These switches also have a built-in PoE power budget meter on the front panel for easy monitoring of power usage.

- 8, 16 or 24 10/100Mbps RJ45 ports
- 2 RJ45/SFP GigE Combo ports
- IEEE 802.3at/at PoE - Power up to 30.8 watts per port
- Easy to view PoE Usage LED meter on front panel
- Web Smart Layer 2 Management
- Unmanaged 8-port with 4-port PoE Injector version also available

Network Switches

Gigabit L2 Managed Switches

Designed for efficient connectivity from the network edge to a backbone switch or server, IFS® Gigabit Ethernet L2 Managed Switches offer GigE copper or fiber (SFP) trunking and powerful full-power PoE capabilities.

Powerful Network Management

- IPv4 and IPv6 Support
- Powerful QoS, bandwidth and traffic management
- Multicasting with Snooping and IGMP Query
- Advanced security
- Built-in diagnostic tools

Robust PoE Management

- Total power budget control
- Per port control (enable/disable, priority, power limit)
- Powered Device (PD) classification detection
- PoE scheduling

Gigabit PoE-Ultra Managed Switch

The IFS® 16-Port Gigabit Ethernet Managed Switch features eight 10/100/1000Mbps Gigabit Ethernet ports with support for Ultra-PoE (60w) plus 4 RJ45/SFP combo ports. Both 100Base-X or 1000Base-X fiber is supported through two GBIC interfaces allowing this switch to provide fast and efficient connectivity from the network edge to a backbone switch or server.

• Robust Layer 2 features
• Engineered for real-time performance
• Full power, isolated per Port PoE
• Built-in monitoring, diagnostics and troubleshooting tools

PoE-Ultra Injector and Extender

The IFS PoE-Ultra Ethernet Injector and 4-port Extender provide a quick and easy solution to PoE-Ultra power (60w) on Ethernet cable. Utilizing Category Network cable, the injector remotely powers a 4-port extender that provides data and up to 15.4w PoE per port to power devices beyond 100 meters (328 ft.).

• Compact size
• Remote power to network edge flexibility
• Standalone, wall-mount or DIN-rail (POE303-EX-4P only)
• POE303-EX-4P can also be used with the IFS NS3503-16P-4C PoE-Ultra Network Switch
• 10/100/1000Base-TX Ethernet support
• IEEE 802.3/802.3u/802.3ab compliance
• IEEE 802.3af/at or IFS PoE-Ultra
• Auto-detect of PoE IEEE 802.3af/at or IFS PoE-Ultra equipment to assist in installation
• Current overload detection
• LED indicators for PoE In, PoE Out, Data
• POE303-MS: (1) RJ45 Data in / (1) RJ45 Data/PoE-Ultra (60w) out
• POE303-EX-4P: (1) RJ45 Data/PoE-Ultra (60w) in / (4) RJ45 Data/PoE-af/at out
• For use with EIA568 Category 5 or better cables
• 3-year warranty

Power Over Coax (PoC)
Network Switches & Media Converters

The IFS® Power over Coax Network Switches and Media Converters are designed to transmit both Ethernet data and power over coax cable up to 1km (3,280 ft.) This solution provides a cost-effective approach by reducing installation cost and increasing ROI by utilizing existing coax to migrate an existing analog system to an IP video surveillance system.

• 1, 8 or 16 BNC ports
• IEEE 1901 standard for power modulation
• PD Alive checking
• 128-bit AES security encryption

• Daisy-chain (up to 3 devices on one link)
• 10/100Mbps Ethernet (POC252 series)
• Auto-negotiation and auto MDI/MDI-X
• Half-duplex back pressure and IEEE 802.3x full-duplex pause-frame flow control
• Gigabit RJ45/SFP fiber ports (POC2502 series)
• IEEE 802.3af/at on RJ45 Ethernet port compliant (POC2502 series)
• Up to 36W insertion power per coax port (POC2502 series)
• Up to 440W total power budget (dependent on switch model)
• Remote power up to 3,281 ft. (1km) with RG6 75Ω coaxial cable
• Full PoE management

Typical Analog Retrofit to IP Solution

1. Replace analog cameras with IP cameras
2. Rebuild entire transmission architecture:
   - Remove coax and lose ROI on cabling investment
   - Ethernet/IP Network design skill set required
   - Configure and test network system
3. Additional cost of migration:
   - Increased material and labor cost by pulling new Cat 5e or Cat 6 cabling
   - Increased cost of network switches at MDF/IDF closets
4. Replace DVR with NVR

IFS® PoC Analog Retrofit to IP Solution

1. Replace analog cameras with IP cameras
2. Redeploy existing coax cabling:
   - Only replace obsolete hardware
   - Increase ROI on cabling
   - Reduced labor cost not having to pull new cable
   - Less networking hardware required
   - Minimal network design skill set required
3. Replace DVR with NVR
Industrial Gigabit Managed PoE+ Switch

The IFS® Industrial GigE PoE+ Managed Switch is engineered for optimum performance in harsh and demanding environments, including highway/mass transit, factories and warehouse locations. With the IFS industrial fail-safe ring topology, these switches are specifically designed for mission-critical network recovery and integrity.

- 8 or 16 RJ45 GigE ports
- 2 GigE SFP or SFP/RJ45 Combo ports
- Support IEEE802.3-af/at
- PD-alive checking
- IFS redundant-ring topology w/ < 20ms network recovery time
- Redundant power with alarm outputs
- Voltage/surge suppression
- -40°C to 75°C operating temperature range

Industrial Gigabit Managed Non-PoE Switches

IFS Industrial Gigabit Managed Switches meet a variety of high-performance copper or optical fiber applications.

- 8-port GigE RJ45 with 2 SFP (fiber) trunking ports
- 8-port GigE SFP (fiber) with 2 RJ45 trunking ports
- IFS redundant-ring topology with < 20ms network recovery time
- Redundant power with alarm outputs
- Voltage/surge suppression
- -40°C to 75°C operating temperature range

HARSH ENVIRONMENTS

Industrial Unmanaged Switches

Designed for easy, “plug-and-play” connectivity, IFS® Unmanaged Ethernet Switches represent a rugged, reliable transmission solution well suited for demanding industrial environments. Easy to install and maintain, these robust switches provide fast and reliable data network transfer to the network edge.

GigE/Fast Ethernet Unmanaged Switches

- 10/100 or 10/100/1000Mbps RJ45 ports
- Redundant power with alarm outputs
- Voltage/surge suppression
- -40°C to 75°C operating temperature range
- Built-in 4-port PoE-af (15.4W) Injector (NS2051-4P/1T only)

Low-profile Wall-Mount Industrial PoE+ Managed Switch

The IFS Low-profile Wall-mount Industrial PoE+ Managed Switch is engineered for optimum performance in harsh and demanding environments, such as highways/mass transit, factories and warehouse locations. The slim low-profile design is ideal for installation in areas of limited space.

- 8 RJ45 GigE ports
- 2 SFP GigE ports
- Supports IEEE802.3-af/at
- Slim IP-30 metal enclosure
- Wall mount or magnet fittings
- 52 to 56VDC operation
- Terminal block or DC receptacle for power
- Voltage/surge suppression
- -40°C to 75°C operating temperature range

NEED COPY FOR THIS LINE
IFS® media converters by Interlogix utilize existing fiber or telephone-wire cabling to migrate from analog to IP transmission easily and efficiently. Reliable and cost-effective, these converters allow system integrators to fully leverage the investment of end-users’ existing cabling infrastructure with proven, industry-standard technology.

### MCR SERIES COMMERCIAL-GRADE MEDIA CONVERTERS

**10/100BASE-TX over Fiber**
- 10/100BASE-TX (Fast Ethernet)
- 1 SFP port (100BASE-FX)
- Multi-mode or single mode
- Up to 43.5 miles (70.0km)

**GigE Ethernet over Fiber**
- GigE Ethernet
- 1 SFP port (1000BASE-SX/LX)
- High-bandwidth transmission
- Multi-mode or single mode

### MCR Chassis

The IFS MCR Series Media Converter Rack offers a low-profile (2.4U) design for efficient, high-density media converter installation in a standard EIA 19” rack. The chassis can accommodate up to 15 media converter modules from the IFS MCR Series family of media converters for Fast or Gigabit Ethernet transmission over optical fiber or telephone wire.

- Robust design: Standard EIA 19”
- Plug-and-Play design
- Hot-swappable
- Built-in diagnostic indicators
- Convenient universal 100-240VAC power supply
- Two rear panel power bays for redundant power supply
- Electrically isolated power bays for highly reliable operation
- 3-year warranty

Fiber to Power over Ethernet (PoE) Media Converters

The IFS® Fiber to Ethernet Media Converters with PoE Injectors provide a cost-effective solution for deploying remote PoE powered edge devices with optical fiber.

- 10/100Base-TX
- Complies w/IEEE 802.3, IEEE 802.3u, IEEE 802.3-af
- Auto-negotiation and MDI/MDI-X
- Inserts 48VDC (15.4W) power on category network cable
- Protects non-PoE devices if accidentally connected
- 100Base-FX
- Multi-mode or single mode versions
- Distances up to 15km
- Plug-and-Play installation
- Compact size
- Auto loop back test function
- 3-year warranty

Fast Ethernet to SC Media Converters

The IFS® Fast Ethernet to SC (fixed optics) Industrial Media Converters are designed for the most demanding IP network applications. These converters also offer multimode or single mode fiber for optimizing network performance with wide operating temperature range.

- 1 or 4 port 10/100Mbps RJ45 ports
- 1 or 2 Fiber (SC) ports
- Redundant power with alarm outputs
- Voltage/surge suppression
- -40°C to 75°C operating temperature range

Fast Ethernet to SFP Media Converters

IFS Fast Ethernet to SFP Industrial Media Converters offer the flexibility of SFP technology for optimizing network performance with operating temperature range. These converters are also designed to meet the needs of the most demanding IP network applications.

- 1 or 4 port 10/100MBps RJ45 ports
- 1 or 2 Fiber (SFP) ports
- IEEE802.3-af (15.4W) [MC251-4P/1S only]
- Redundant power with alarm outputs
- Voltage/surge suppression
- -40°C to 75°C operating temperature range

Network Fiber Switch
Your one-source transmission solutions provider.
Delivering stable network distributed power is critical for today’s demanding end-point devices. IFS® Power over Ethernet (PoE) accessories by Interlogix provide a full line of and external power supply options for flexible, robust and reliable power for IP network infrastructures.

IFS Power over Ethernet (PoE) accessories provide quick and easy solutions for PoE challenges. A full range of IEEE 802.3-af or at compliant products allows for injecting, extending or splitting Power over Ethernet cable to provide extreme flexibility in handing PoE at the edge for powered devices, including IP-based Video, Access and Intercom, as well as VoIP and WAP applications.

### PoE Injectors
- IEEE 802.3-af or -at compliant
- Fast or Gigabit Ethernet
- 15.4 or 30W PoE
- 4-port Fast Ethernet/PoE-af

### PoE Extenders
- IEEE 802.3-af or -at compliant
- Fast or Gigabit Ethernet
- Extend PoE Ethernet beyond 100m
- Requires no external power supply

Small Form-factor Pluggables (SFPs)

High-performance transmission over optical fiber

IFS® Small Form-Factor Pluggable (SFP) transceiver modules by Interlogix are designed for high-performance, integrated duplex data transmission over optical fiber. These SFP transceiver modules are compliant with the industry’s SFP Multi-Source Agreement (MSA) standard.*

Fast Ethernet

IFS Fast Ethernet SFPs are available in multi-mode or single mode versions, 1- or 2-fiber configurations with LC connectors. Hardened versions operating in a wide temperature range of -40°C ~ 75°C are also available with transmission distances up to 20km.

Gigabit Ethernet

Gigabit Ethernet SFPs are available in multi-mode or single-mode versions, 1- or 2-fiber configurations with LC connectors. An SFP with an RJ45 connector is available to add additional copper ports to a fiber network switch. Gigabit Ethernet SFPs are also available in hardened versions with transmission distances up to 70km.
