User-friendly surveillance at a budget-friendly price

Ideal for small retail stores, medical offices, gas stations and residential applications, the TruVision® NVR 10 IP video kit from Interlogix provides a complete, cost-effective surveillance solution that’s also incredibly easy to install.

Available in 4- and 8-channel configurations, each kit includes a choice of TruVision cameras with no IP configuration or programming required. Simply install the cameras, connect to the built-in PoE switch and power on the NVR to start recording. Manage multiple recorders with the free downloadable TruVision Navigator VMS software and view cameras on-the-go with the free TVRmobile app.

Quick & Easy Installation

1. Install cameras
2. Connect them to the NVR
3. Power up the NVR

Ideal for small retail stores, medical offices, gas stations and residential applications, the TruVision® NVR 10 IP video kit from Interlogix provides a complete, cost-effective surveillance solution that’s also incredibly easy to install.

Available in 4- and 8-channel configurations, each kit includes a choice of TruVision cameras with no IP configuration or programming required. Simply install the cameras, connect to the built-in PoE switch and power on the NVR to start recording. Manage multiple recorders with the free downloadable TruVision Navigator VMS software and view cameras on-the-go with the free TVRmobile app.
