TruVision Navigator
Unified Security Solution

OVERVIEW

TruVision Navigator by Interlogix represents our latest advancement in integrated security solution software. The system delivers powerful software capabilities and allows users to integrate and manage their TruVision video, TruPortal™ access control, UltraSync® intrusion panels and IFS® network switches with a centralized, intuitive user-interface. TruVision Navigator can be used as a standalone application or can be deployed as a client/server architecture, making it scalable for deployment in either small- or large-scale commercial environments.

Using the intuitive TruVision Navigator user interface, administrators can remotely configure TruVision IP cameras, DVRs, HD-hybrid recorders and NVRs. TruVision Navigator also provides direct live/playback video viewing from TruVision IP cameras with SD memory cards. Key features include high performance video viewing, video tabs, custom views, maps, live event monitoring, camera sequencing, 360° camera de-warping, logical event filter, TruPortal, UltraSync, and IFS switch integration, browser support, a built-in device manager and network diagnostic tools.*

TruVision Navigator also offers backwards compatibility support for select TruVision recorders to aid in system upgrades. The software is able to provide efficient network bandwidth management and is ideal for LAN or WAN applications that incorporate multiple sites, such as schools, retail stores, bank branches, entertainment venues and geographically dispersed organizations.

STANDARD FEATURES

Intuitive Operator User Interface
- Logical view to customize the video device tree
- Up to 10 video tabs to create a customized video wall
- Custom views that allow user-specified groups of video streams and sequencing
- Place access control doors and intrusion sensors on maps and link to cameras for a fully integrated and centrally managed security solution
- Pop up the event monitor, with live video, when triggered by an alarm event
- Add video bookmarks and manage with bookmark manager
- Directly view live/playback video from TruVision IP cameras (with SD cards)
- Built-in TruVision 360° camera de-warping
- Optional USB keypad/joystick

Easy System Installation and Maintenance
- Remote focus/zoom control functions
- Discover TruVision video devices, TruPortal panels, UltraSync panels and IFS switches on the network
- Built-in Device Manager provides easy way to activate, set-up and maintain TruVision devices on a network
- View camera names on IFS switch ports, view switch bandwidth usage and remotely cycle PoE on each port
- Remote device configuration and client software distribution

System Administration Management
- Standalone and client/server architecture that supports server offline mode
- Defined groups and user permissions
- Automatic health diagnostic service to maintain system uptime
- Audit trails and report exporting
- Built-in device diagnostics and reporting
- The ability to automatically pause video streams that are not being viewed

*Some features may require the purchase of a license.
Operator-Friendly User Interface

TruVision® Navigator brings together TruVision video, TruPortal™ access control, UltraSync® intrusion and IFS® network switches into one complete interface.

**Notifier**
Provides real-time, color-coded video event notification of TruPortal and UltraSync alarm events.

**Device Tree**
Provides quick access to TruVision video cameras and recorders, TruPortal access control, UltraSync intrusion and IFS network switches.

**Facility/Campus Maps**
Import facility/campus maps and place cameras, access control doors, and intrusion sensors on maps. Easily embed maps within maps.

**Viewer**
View live and recorded video with up to 10 detachable video viewing tabs allows you to create a virtual video wall. The pop-up event monitor window provides live video during an alarm. Users can easily setup individual video viewing tiles for sequencing of multiple cameras for easy monitoring.

**Video Playback Controls**
Easily play, pause, rewind and bookmark video recordings with controls and timeline.

**Collector**
Acts as a holding repository for video segments, snapshots and local recordings ready for export.
Built-in Device Manager

**Device Discovery**
Device Manager searches for online devices within the local network and displays network information for each device.

**Activate Devices**
Use this tool to discover and activate new TruVision® devices and assign a unique password for added security.

**Storage Calculator**
Launch the TruVision recorder storage calculator right within TruVision Navigator.

**Firmware Update**
Use the Firmware Update window to automatically check if your devices are up-to-date. Upgrade the firmware of one device or multiple devices on a network.

**New System Setup Wizard**
Use the new System Setup Wizard to set up a first-time installed video system.

Device Manager Tools

Click on the Device Manager Tools button in the Device Manager window to access more useful tools.

Device Manager Capabilities

The following Device Manager features are compatible with the following Interlogix devices.

Supported Recording Devices

**DVRs and HD-Hybrid Recorders**

- TruVision DVR 10
- TruVision DVR 11
- TruVision DVR 12
- TruVision DVR 12HD
- TruVision DVR 15HD
- TruVision DVR 41
- TruVision DVR 42
- TruVision DVR 44HD
- TruVision DVR 45HD
- TruVision DVR 60

**Network Video Recorders**

- TruVision NVR 10
- TruVision NVR 11
- TruVision NVR 20
- TruVision NVR 21
- TruVision NVR 21P
- TruVision NVR 21S
- TruVision NVR 22
- TruVision NVR 22P
- TruVision NVR 22S
- TruVision NVR 70
- TruVision NVR 71

Note: The following recorders are no longer supported in TruVision Navigator v8.0 and above: DSR, DvMRE, DvSE, DvSR, NVR30, NVR31, NVR40, StoreSafe, SVR, SymDec. Customers may continue to use legacy TruVision recorders with Navigator v7.0, but technical support is no longer provided.
