

Simon® 5” TouchScreen

60-924-RF-TS5-2

Classic interface

Alarm.com interface

OVERVIEW

The Simon 5” TouchScreen (60-924-RF-TS5-2) is a color LCD screen featuring a user-friendly interface that complements Simon security systems for safety and peace of mind. The easy to use touch screen provides system owners with at-a-glance home status information, allowing easy and convenient control of Simon systems. This touch screen is the ideal solution for providing additional points of control throughout the home. Up to four touch screens can be installed in one home for maximum convenience.

Simon 5” TouchScreens quickly and seamlessly connect to the Simon panel using the Interlogix wireless 319.5MHz protocol. Each touch screen comes with both a wall plate and table top stand to accommodate wall mounting or table top installations. They also have a built-in rechargeable battery that provides backup power in case of power outages. An integrated speaker provides voice, chime and siren notifications, alerting system owners of trouble and alarm conditions.

In addition to controlling the alarm features of the Simon system, when installed with a Simon XTi-5i panel that is equipped with Alarm.com®, Simon 5” TouchScreens offer a selectable user interface which matches the mobile interactive service application in color, style, and icons. It also allows for control over functions including Z-Wave wireless lighting control devices, thermostats for home HVAC systems, door locks, and garage doors. Alarm.com also enables additional lifestyle-enhancing information such as the current outdoor temperature and a four-day weather forecast right on the screen.

STANDARD FEATURES

- 5-inch color LCD screen with user interface (UI) delivers at-a-glance status of home and property
- Uses the panel’s wireless 319.5MHz RF to interconnect to the panel
